TEAM FORMATION—3 to 5 Players Per Team

- The total of the skill levels of the 3 players fielded in any team match cannot exceed 15.
- A player’s highest skill level between formats (8-Ball & 9-Ball) must be used towards the 15-Rule. EXCEPTION: SL 8/9’s will count as 7’s in this tournament. Males compete as SL3 or higher.
- Players may only participate on one team and must be on an active roster within Illiana APA.

TOURNAMENT RULES

- [Complete Rules @ poolplayers.com ->Tournament Info -> APA World Pool Championships ->Team Captains Championship](#)
- Team Captains flip a coin to decide who must declare their three players for the match. Winner of the flip has the choice of declaring first or having the opposing Team Captain choose first. The Captains will list their players in ascending order (lowest to highest). That list determines the player rotation, and is locked for the match.
- Players lag to see who wins the first break. After that, the winning team breaks with the next player in the rotation after each rack.
- Once the first two players have completed their rack of 8-Ball, the second two players in the rotation will play a rack of 9-Ball. Upon that rack’s completion, the next two players in the rotation will play a rack of 8-Ball. Once set, the player rotation continues until a team reaches the required points necessary to win the match using the **Games Must Win** chart.
- Only one player of skill level 6 or higher may play in any given match.
- One time out per player per game is allowed.
- Each individual rack is worth one point.
